João Luiz Becker is full professor of Production Management and Systems Analysis in the School of Management, Federal University of Rio Grande do Sul, Brazil. In the school he leads the Research Group on Information and Decision Support Systems, working mainly in its Decision and Modeling Laboratory. He received a PhD degree in Management Science from UCLA (1986), a M.Sc. degree in Applied Mathematics from Institute of Pure and Applied Mathematics, Brazil (1978), and B.S. degrees in Mathematics (1974) and Economics (1973) from the Federal University of Rio Grande do Sul, Brazil. His research interests encompass areas such as decision analysis, decision support systems, operations research, complex systems modeling, and Information Technology impact on organizations. He has published in several journals including Management Science, Industrial Management & Data Systems, International Journal of Operations & Production Management, International Journal of Computer Integrated Manufacturing, Journal of Risk and Uncertainty, International Journal of Software Engineering and Knowledge Engineering, and Decision Support Systems.
